

# AVYOL PAINT ADDITIVES

## (Multi-Purpose Paint & Coating Solvents)

Paint Additives are essential auxiliaries designed to improve performance, finish, and durability of paint systems. These products ensure smoother application, enhanced drying properties, improved gloss, and resistance against environmental stress. Each additive is tailored for specific formulations, providing flexibility to manufacturers and applicators.

### Product Range

- Epoxy Paint Thinner Chemicals (PU Paint)
- Epoxy Paint Thinner
- Enamel Paint Thinner
- Stoving Paint Thinner
- Lacquer Thinner
- Lacquer Retarder

### Typical Specifications

Product	Appearance	Solubility	Flash Point (°C)	Viscosity (cSt @ 40°C)	Application Use
Epoxy Paint Thinner Chemicals (PU Paint)	Clear, free-flowing liquid	Fully miscible	20-25	Low	For PU-based epoxy systems
Epoxy Paint Thinner	Clear liquid	Miscible	20-25	Low	Dilution of epoxy paints
Enamel Paint Thinner	Water-white	Miscible	25-30	Low	Enamel paint adjustment
Stoving Paint Thinner	Clear liquid	Miscible	20-25	Low	Stoving enamel coatings
Lacquer Thinner	Clear, fast-evaporating	Miscible	15-20	Very Low	Wood & industrial lacquers
Lacquer Retarder	Clear, medium-evaporating	Miscible	30-35	Low	Improves flow & reduces blushing
